PROJECTS

NEWS CHRONICLE | YOUR SOURCE FOR THE LATEST NEWS   Client   Server   Live Preview

News Chronicle is a dynamic platform that provides up-to-date news articles, analysis, and insightful stories across various categories, keeping readers informed and engaged in real-time.

Features:
- **User**: Can browse the latest news and subscribe to premium news content. Can delete and update their own articles. Free users are limited to posting one article
- Premium user: Can add, update, or remove unlimited news articles. Has access to premium news content. Can choose from multiple price subscription durations.
- **Admin**: Can view all insights through the dashboard. Has the authority to update, delete, reject, or mark articles as premium, with the reason for rejection. Requires admin approval for all articles before publication. Can manage users, including promoting others to admin roles and adding new publishers.
- **Admin credential**: Email - admin@gmail.com | Password - tyTY5656

Tech-Stack: React ,Tailwind, motion, JS, Express JS, Firebase Auth, MongoDB, JWT, GSAP

LOST NEST | FIND WHAT'S LOST, RETURN WHAT'S FOUND   Client   Live Preview

Lost Nest is a Lost and Found web app that helps users report lost or found items and connect to recover belongings, bridging the gap between those who lost and those who found items.

Features:
- User: Can report lost or found items by providing details such as item name, description, location, and images. And user can update the items information and delete the item.
- Search & Filter: Advanced search functionality allows users to find items based on categories, location, and keywords.
- Authentication: Secure user login system using Firebase, allowing users to track their reported items.

Tech-Stack: React ,Tailwind, motion, JS, Express JS, Firebase Auth, MongoDB, JWT, GSAP

CARE MATRIX | TEAM PROJECT   Client Server Live Preview

Care Matrix is a full-stack web app built to streamline emergency handling and healthcare services. It features real-time emergency dashboards, service listings, and a live review system to improve patient support and transparency.

Features:

- **Emergency Dashboard & Triage System**: Implemented a robust Emergency Dashboard that displays real-time emergency case details, Emergency contact access, and real-time ambulance booking system. Built a Triage page where users can report emergencies, which a pharmacist will assign to available doctors and rooms.
- **Service Management & Doctor Listings**: Developed a dedicated Services section that lists all available medical specialties, doctors by category, and details of healthcare facilities for better user clarity and navigation.
- **Interactive Review System**: Created a dynamic reviews platform allowing users to sort reviews by category, search, leave comments, and like once per review to ensure engagement and authenticity.

Tech-Stack: React, Tailwind CSS, JavaScript, Shadcn UI, DaisyUI, React Router, React Query, Redux, Firebase, Node.js, Express.js, MongoDB, JW

EDUCATION

Southeast University   Dhaka, Bangladesh

CSE, Bachelors of Science   2022 Present
